

SYSTEMS AND SERVICES TO IMPROVE DOCUMENT STORAGE, PROCESSING AND WORKFLOW

CRS Document Solutions helps companies improve efficiency, boost productivity and reduce costs through the provision of leading technology and document workflow management.

Whether a small office with a single photocopier or a multi-site enterprise with a fleet of multi-function devices; we blend tried and tested technology with the latest software to support modern-day businesses and professionals.

HOW WE WORK

The team at CRS Document Solutions understands that all businesses are different. Our account managers and consultants work with customers to observe their processes and then devise ways to help them access, store and share the information they need in the way that they want it – whether printed, photocopied or on screen.

From preferred leasing and purchase plan options to the design and installation of a bespoke document workflow system; we take the time to establish exactly what customers expect from their investment with us and then work to deliver positive outcomes.

MEASURABLE BENEFITS

Our approach can bring a host of measurable business benefits - from cutting back on print quantities for the sake of the environment to reducing costs by preventing unnecessary waste; boosting productivity through process optimisation to the peace of mind brought by enhanced data security.

Furthermore, as the world moves away from closed networks towards cloud based solutions, CRS and its partners are pioneering the new consultative spirit of the age.

A five stage 'assessment – design – implementation – management – optimisation' model underpins our managed document solutions framework. It's an approach that has proven to cut print costs by up to a third.

WHY WORK WITH US

From headquarters in Oxfordshire, CRS combines over twenty years of expertise with its passion for innovation in a digital age to bring customers an unrivalled level of service and insight that can transform businesses and processes.

This makes CRS more than just an average copy, print and scan supplier.

It makes us a strategic document and information technology partner that has the business objectives of its customers at its core.

SERVICES

Bolster productivity with managed document solutions

Automate your document management processes by transforming to a digital document management workflow. Streamline your operation to effortlessly process, track, edit, store, retrieve and manage documents and the specific data you need.

Take your office with you - with Cloud and mobile apps

Access the critical business information you want, when you want it. Cloud storage and mobile access means accessing, printing and scanning documents from handheld devices anytime, any-place, anywhere.

Rein in your printing costs with print control software

Our intuitive software gives you a handle on one of your largest office expenses:

Make data security a top priority

Block unauthorised access and protect highly confidential documents with the latest print security software and techniques.

Managed document solutions

- Reduce costs
- Automate processes
- Increase speed

Cloud and mobile print

- Work on the go
- Consolidate costs
- Support remote working

Print control and security

- Avoid unnecessary expense
- Protect your business
- Print sustainably & responsibly

PRODUCTS

Kitting out your office space with the specific printing, scanning and copying requirements you need has never been easier, when you partner with CRS Document Solutions.

We give impartial advice into the suitability of state-of-the-art systems from the likes of Fujitsu, Kyocera, Konica Minolta and Sharp, making sure the installation of the machinery you choose is

right for your particular operational needs – no matter how big or small.

Whether you decide to purchase a machine outright, or opt for a lease that enables you to control your costs, we'll make it easy to acquire the exact equipment you need to keep your business running.

Printers
