

Hardware Overview

Why choose Kyocera Document Solutions?

Smarter Partnerships, Smarter Solutions

We partner with you to create competitive advantage, turning information into knowledge.

A valuable partner that grows together with you

We deliver products and services with the “Customer-First” principle as our top priority. For more than 20 years we have minimised environmental impact by developing long-life, low-waste printers and multifunctional products.

Customers look for borderless streamlining of operational processes and the need for quick decision-making has increased. The volume of documents handled on the business front line has grown exponentially. Issues involved with document processing are multiplying.

We evolve as your needs change

Our strong foundation of hardware, sales and maintenance, extensive consulting services and business applications enables us to understand your needs and solve document-related issues through our Total Document Solutions approach.

Kyocera Document Solutions will continue to grow together with you, and be a partner that will contribute to your business growth. In essence, we combine professional expertise with a human kind of partnership.

We support all your business needs

At Kyocera Document Solutions, we use our innovative ideas, award-winning

hardware and smart software to deliver value, overcome your challenges and put your organisation's knowledge to work for competitive advantage.

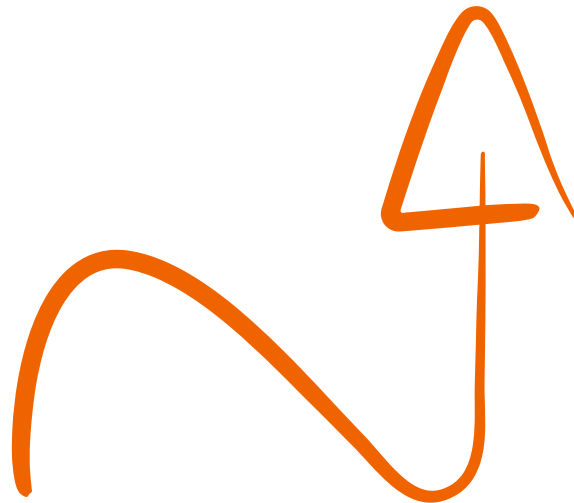

- **Paper and documents are just the start**
Our Total Document Solutions approach looks at every part of your business, so you work smarter.
- **We help you solve business critical challenges**
This includes reducing costs, automating business processes and increasing productivity. Our Research and Development meets your changing needs.
- **A powerful business model designed around you**
Our award-winning ECOSYS printers and MFP products deliver lower costs, reliability and environmental benefits.
- **Lower your TCO**
Kyocera is renowned for our industry lowest TCO thanks to our end-to-end digital imaging production portfolio.
- **Unleash the full potential of hardware**
Our business applications and consultative services optimise document workflow, unleashing the potential of hardware.
- **We're global and always personal**
Benefit from exceptional service and tailor-made solutions that best support your business — regardless of size.

Powerful, Reliable and Economical

Whether on your desktop or in office production - be it in colour or black and white: with Kyocera, you always achieve the best possible print quality while easily controlling your output costs.

Kyocera devices and their components have been designed to be extremely reliable and highly economical. And since you can complement many of them with various options at anytime, you can be sure that you always have a system fitted to your needs by your side. Whatever you need to print, copy, scan or fax - the numerous finishing options for our multifunctionals will provide you with a professional result.

Keeping our customers at the heart of what we do, Kyocera ensures that only the best-of-breed software solutions are used to add strategic value to your document solutions.

Our Product Range

We support your end-to-end digital business needs

At Kyocera Document Solutions, we use our innovative ideas, award-winning hardware and smart software to deliver value, overcome your challenges and put your organisation's knowledge to work for competitive advantage.

Award-winning printers

Our award-winning printers and multifunctional products offer superior cost efficiency, intuitive controls, reliability and environmental benefits.

Flexible software that fits your business

Our business applications expand the capabilities of your printers, improve security, simplify workflow and give you an edge.

Long-lasting consumables

For optimum performance use Kyocera genuine toner, with ceramic cleaning beads to ensure the printer drum stays clean and particle free.

Laser Printers and Multifunctionals

ECOSYS stands for ECOnomy, ECOlogy and SYStem solutions. This concept is unique to Kyocera and is based on our ceramics technology expertise. ECOSYS provides reliable imaging solutions with incredibly durable long-life internal components, highly economical running costs, and significantly less waste during their lifetime.

The long-life components, especially the drum and the developer unit, hardly ever need to be replaced, meaning the devices have exceptionally low printing costs for their class. As toner is the only consumable, waste is reduced by up to 75% compared to other printers in their class. Recycling is also more efficient as Kyocera's toner cartridge comprises only 4 components compared to a conventional toner cartridge that can have as many as 60 components.

For easy and problem-free network integration, most ECOSYS devices have a common operating platform with standard controllers and drivers - significantly cutting the IT workload. Paper handling options are also universal across the respective product lines.

Multifunctionals

Print, copy, scan and fax. TASKalfa multifunctionals offer exceptional productivity through outstanding speed, powerful controller technology and professional utilities. For most of the devices, functions are accessible via a large, colour touch panel with intuitive controls and menu structure.

Their long-life components also guarantee exceptional reliability and minimal downtime. Most of the devices can be complemented with a range of intelligent technical features, as well as paper handling and finishing options, to improve their operating efficiency even further.

What's more, Kyocera's software development platform HyPAS™ for personalised business applications allows you to seamlessly integrate your MFP into your existing business workflow. Managing your document output has never been easier!

MFP Colour A4

Multifunctionals A4 colour

Compact machines that are mobile ready. Reliable printing, copying, scanning and fax for small businesses and small teams.

Kyocera Toners

Kyocera Original Toners

Every business wants to save money, but some cost-cutting measures are counterproductive and may cause more harm than good.

This is why Kyocera has spent decades developing technology that consistently delivers lower running costs than our competitors. Toner is not a “one size fits all” consumable and there is only one supplier who can deliver the quality, economy and reliability you expect when you purchase a Kyocera device.

Once your business has taken the first step to lowering running costs with Kyocera devices, it may seem logical to go one step further by using non-original toner. However, the use of non-original toner can jeopardise:

- **Economic and cost-saving targets**
- **Health risk associated with the non-original toner**
- **Device durability**
- **Document quality**
- **Procurement and administration procedures**

Economy and cost-saving targets

Your business can save money with genuine toner. Original Kyocera toners are independently tested to deliver a specific number of pages and you can be certain that the Kyocera cassette you purchase will deliver the output volume you expect, which may not be the case for non-original toners.

Health risk

Kyocera aims to create safer working environments. Therefore, Kyocera toners must not contain harmful substances such as:

- **Mercury, cadmium, lead and nickel**
- **Chromium VI compounds**
- **Dyes that might release carcinogenic particles**

Device health

The long-life design of Kyocera devices is fundamentally different to other laser products. The durable components in our ECOSYS and TASKalfa multifunctionals are designed to operate in conjunction with original Kyocera toner.

Document quality

The high image quality for which Kyocera devices are known is linked to the tiny size and accurate shape of the individual toner particles in an original Kyocera toner cassette. Non-original toner particles may be too large or poorly shaped to deliver the same quality.

When is it illegal?

Whereas third party toner is legal, it is illegal for any organisation to manufacture or sell toners that purport to have been manufactured by Kyocera but have not. These are called counterfeit toners.

Identifying non-original toners

A counterfeit toner is manufactured and packaged to look like an original Kyocera toner. Many purchasers are unaware that they have been supplied with counterfeit toner and may remain unaware until quality, economy or reliability problems occur. An original Kyocera toner has the Kyocera logo printed on the packaging and moulded into the toner cassette. Additionally, a hologram; that does not change colour when used with a Handy Viewer is clear evidence that the toner is not genuine. Lastly there will be unusually low pricing associated to the toner product.

Warranty - no limitations for authenticity

Ultimately, it is a customer's decision whether to use a Kyocera original toner or a non-original one. However, technical defects or other technical problems caused by using non-original toner will not be covered by Kyocera's Manufacturer's Warranty. Only use original Kyocera toners so that there are no limitations to your guarantee.

A long-term commitment

ECOSYS printers offer a uniform platform for maximum flexibility and expandability. By choosing Kyocera, you are not only choosing unrivalled low printing costs, you are also helping to preserve our environment. Choosing Kyocera can mean producing up to 85% less electronic waste during the life of the device thanks to ECOSYS technology.

Preserving resources by avoiding waste

Kyocera devices produce significantly less waste because the ECOSYS concept does not involve the replacement of the photoconductor drum and developer unit when the toner runs out. For example: an average competitor's toner container includes 60 separately manufactured components, while an original Kyocera toner cassette includes just four.

Certified document fidelity

By using original Kyocera toner with your Kyocera ECOSYS devices, you ensure the authenticity of your documents, contracts and letters. The paper technology foundation and German Federal Institute for Materials Research and Testing have both certified most Kyocera devices using Kyocera original toner as being suitable for the printing of notarised documents.

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. With professional expertise and a culture of empathetic partnership, we help organisations put knowledge to work to drive change.
